<form>

The <form> represents a document section containing interactive controls for submitting information.

HTML

CSS

```
1 <form action="" method="get" class="form-example">
2   <div class="form-example">
3     <label for="name">Enter your name: </label>
4     <input type="text" name="name" id="name" required>
5   </div>
6   <div class="form-example">
7     <label for="email">Enter your email: </label>
8     <input type="email" name="email" id="email" required>
9   </div>
10  <div class="form-example">
11    <input type="submit" value="Subscribe!">
12  </div>
13 </form>
14
```

Enter your name:

Enter your email:

It is possible to use the `:valid` and `:invalid` CSS pseudo-classes to style a `<form>` element based on whether or not the elements inside the form are valid.

Content categories	Flow content, palpable content
Permitted content	Flow content, but not containing <form> elements
Tag omission	None, both the starting and ending tag are mandatory.
Permitted parents	Any element that accepts flow content
Implicit ARIA role	form if the form has an accessible name, otherwise no corresponding role
Permitted ARIA roles	search, none or presentation
DOM interface	HTMLFormElement

Attributes

This element includes the global attributes.
